Proveedores Externos

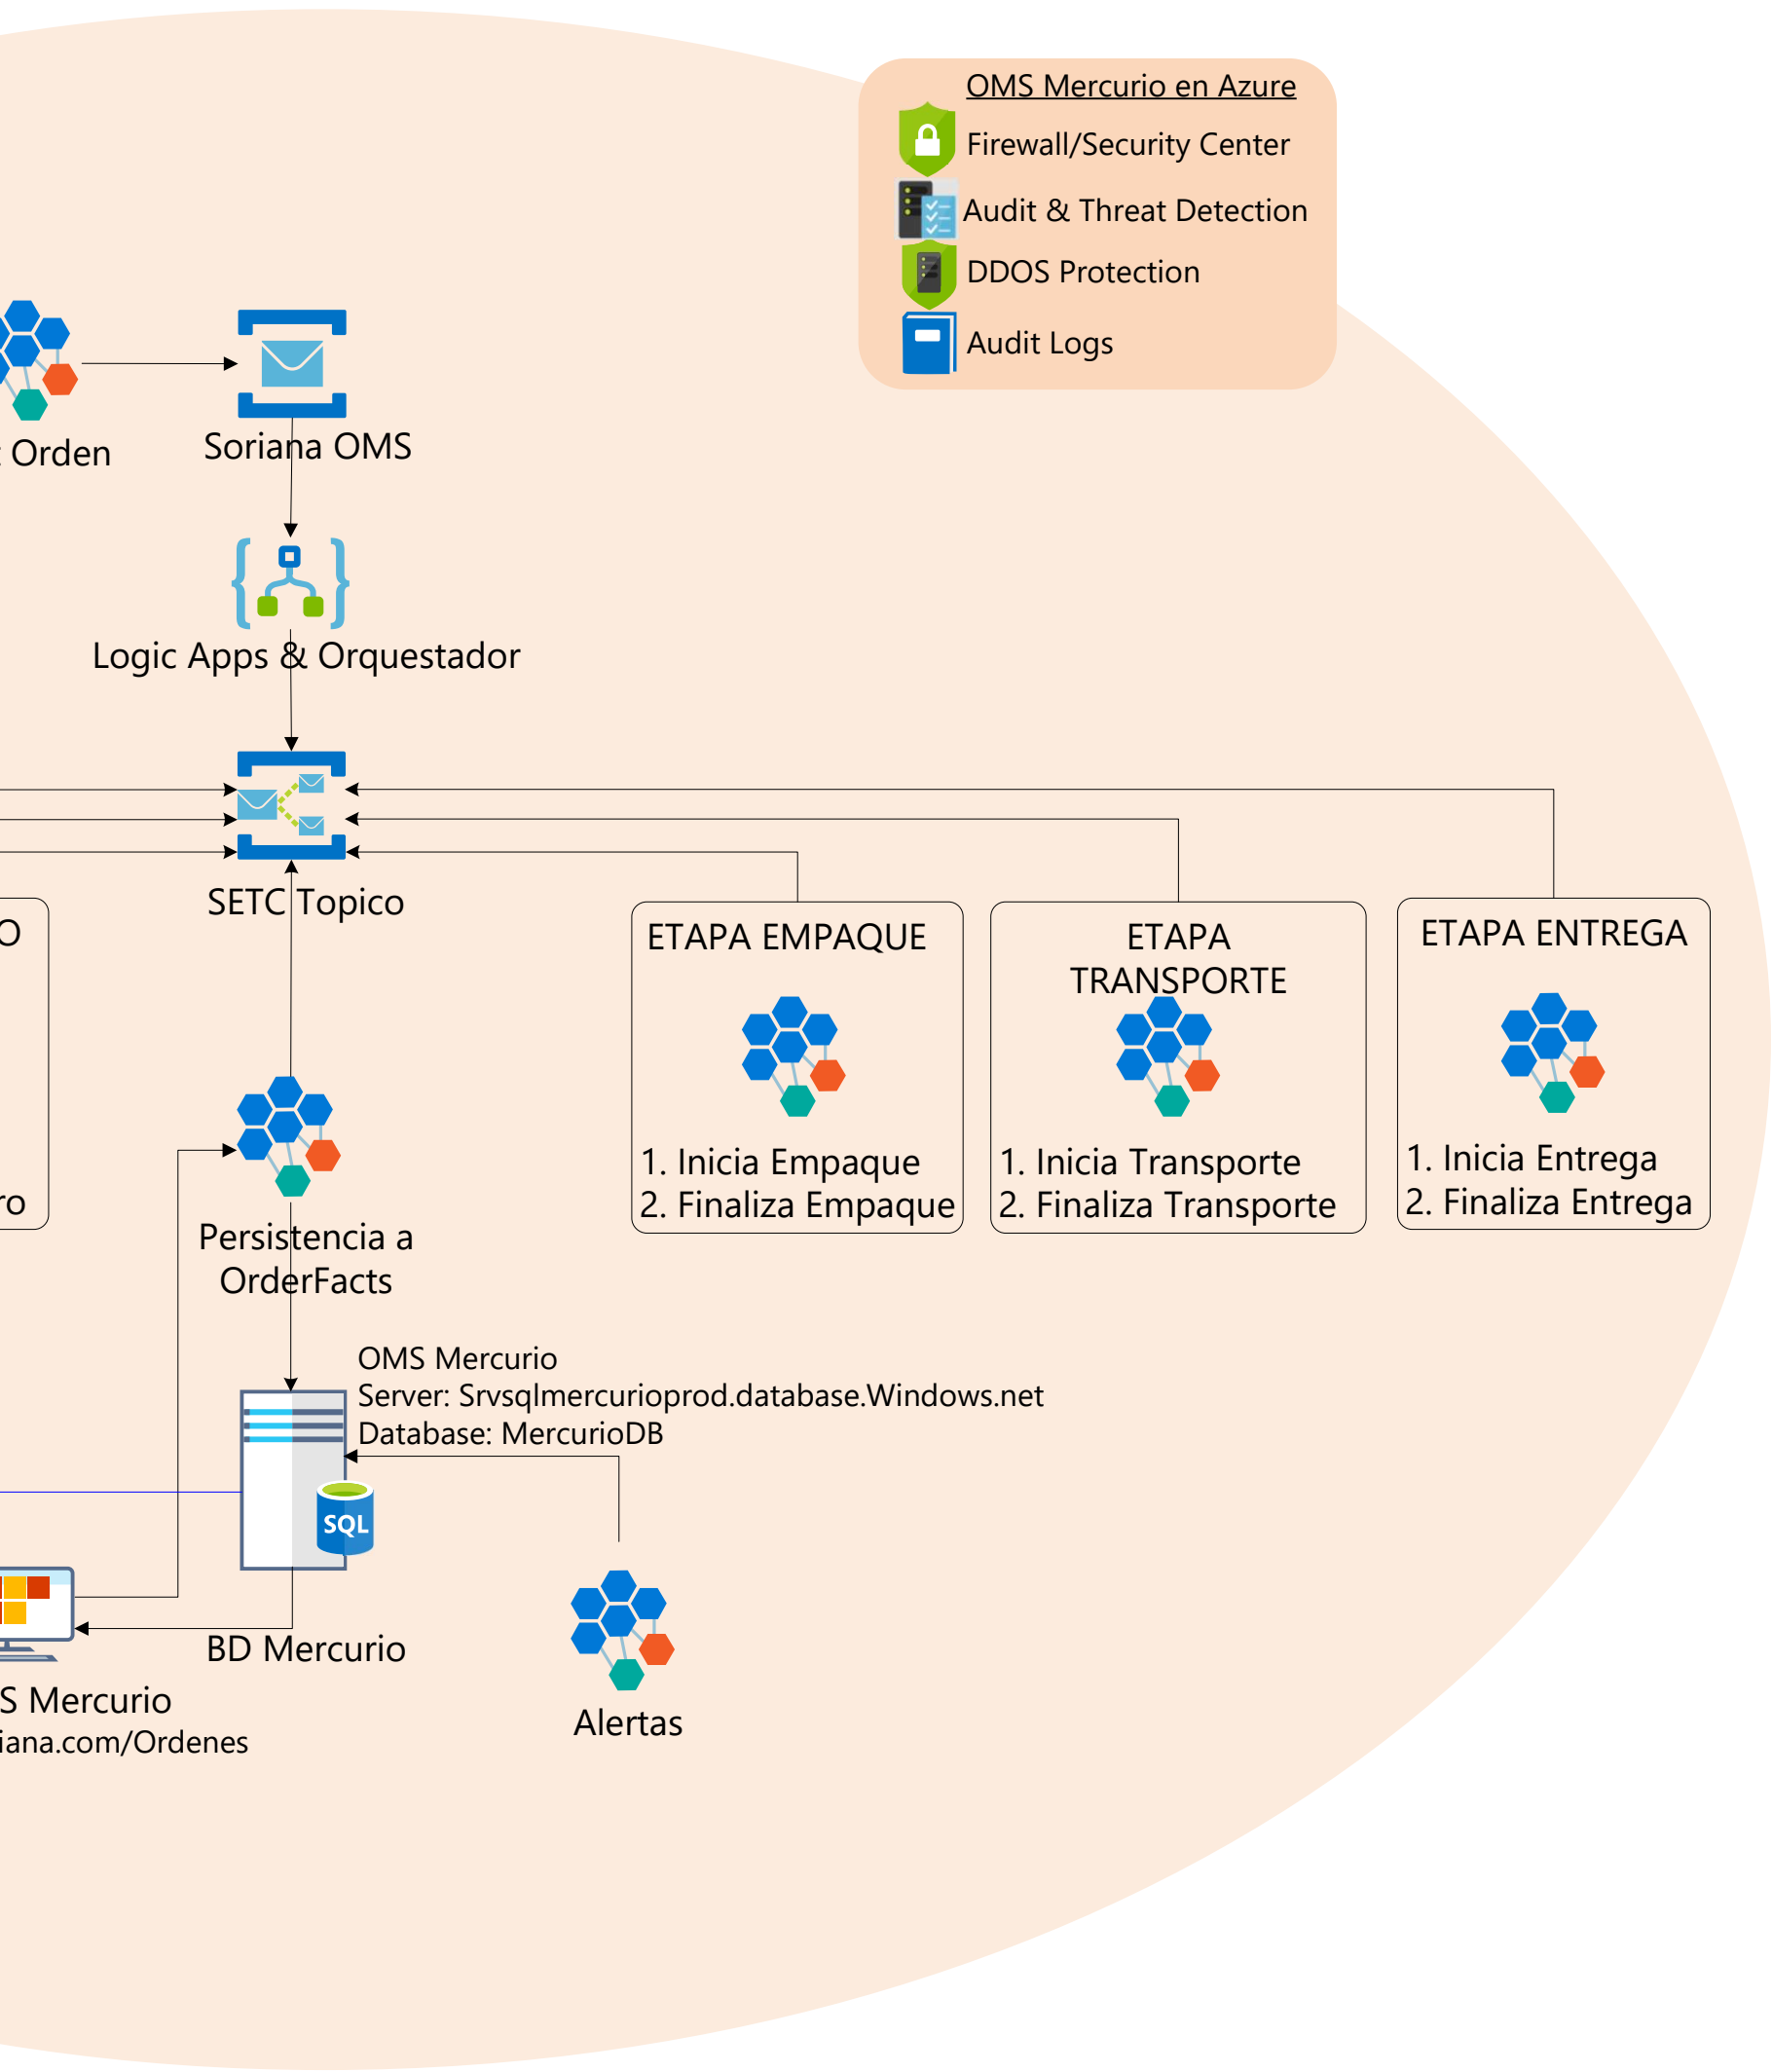

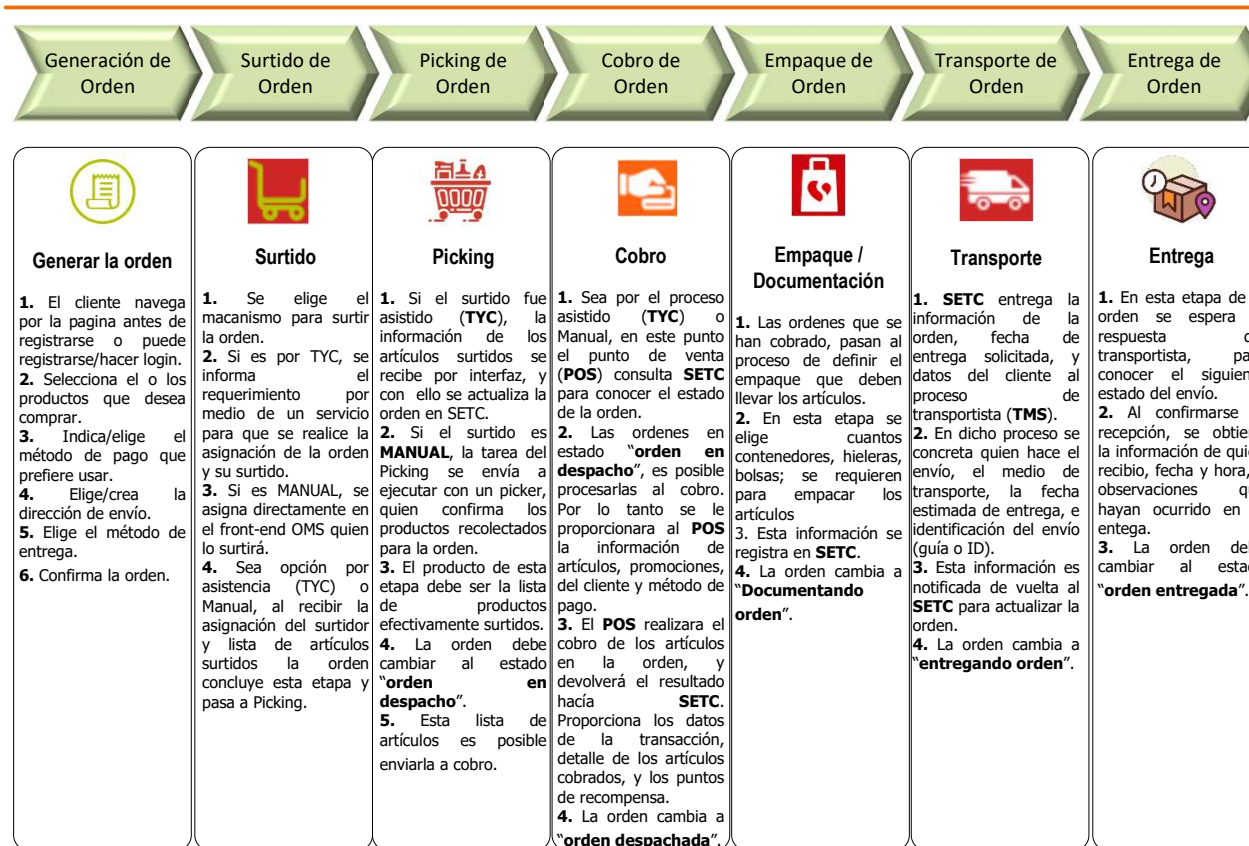

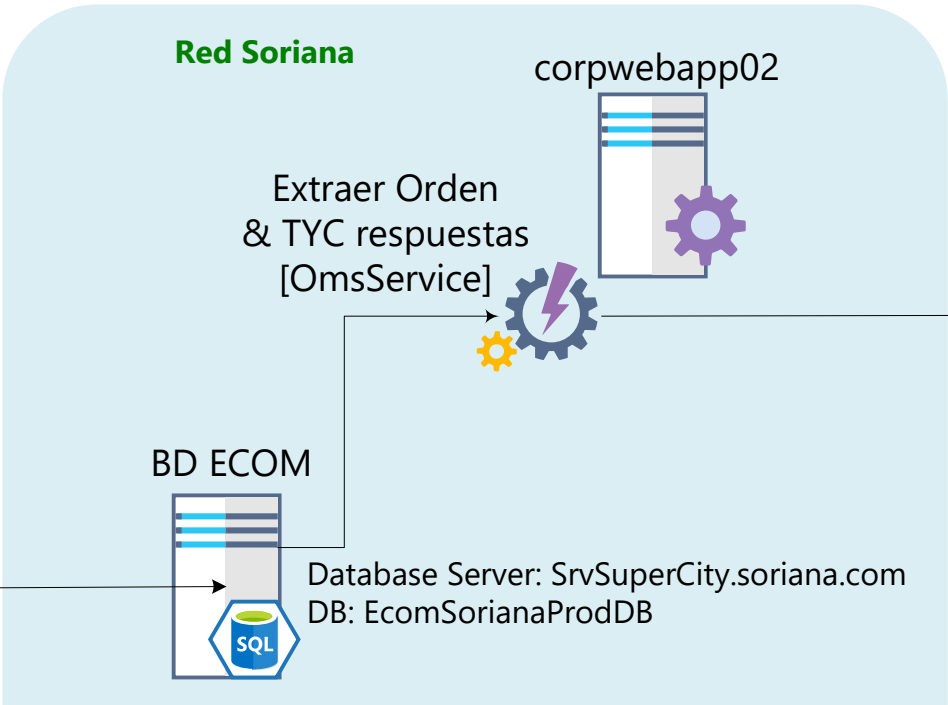

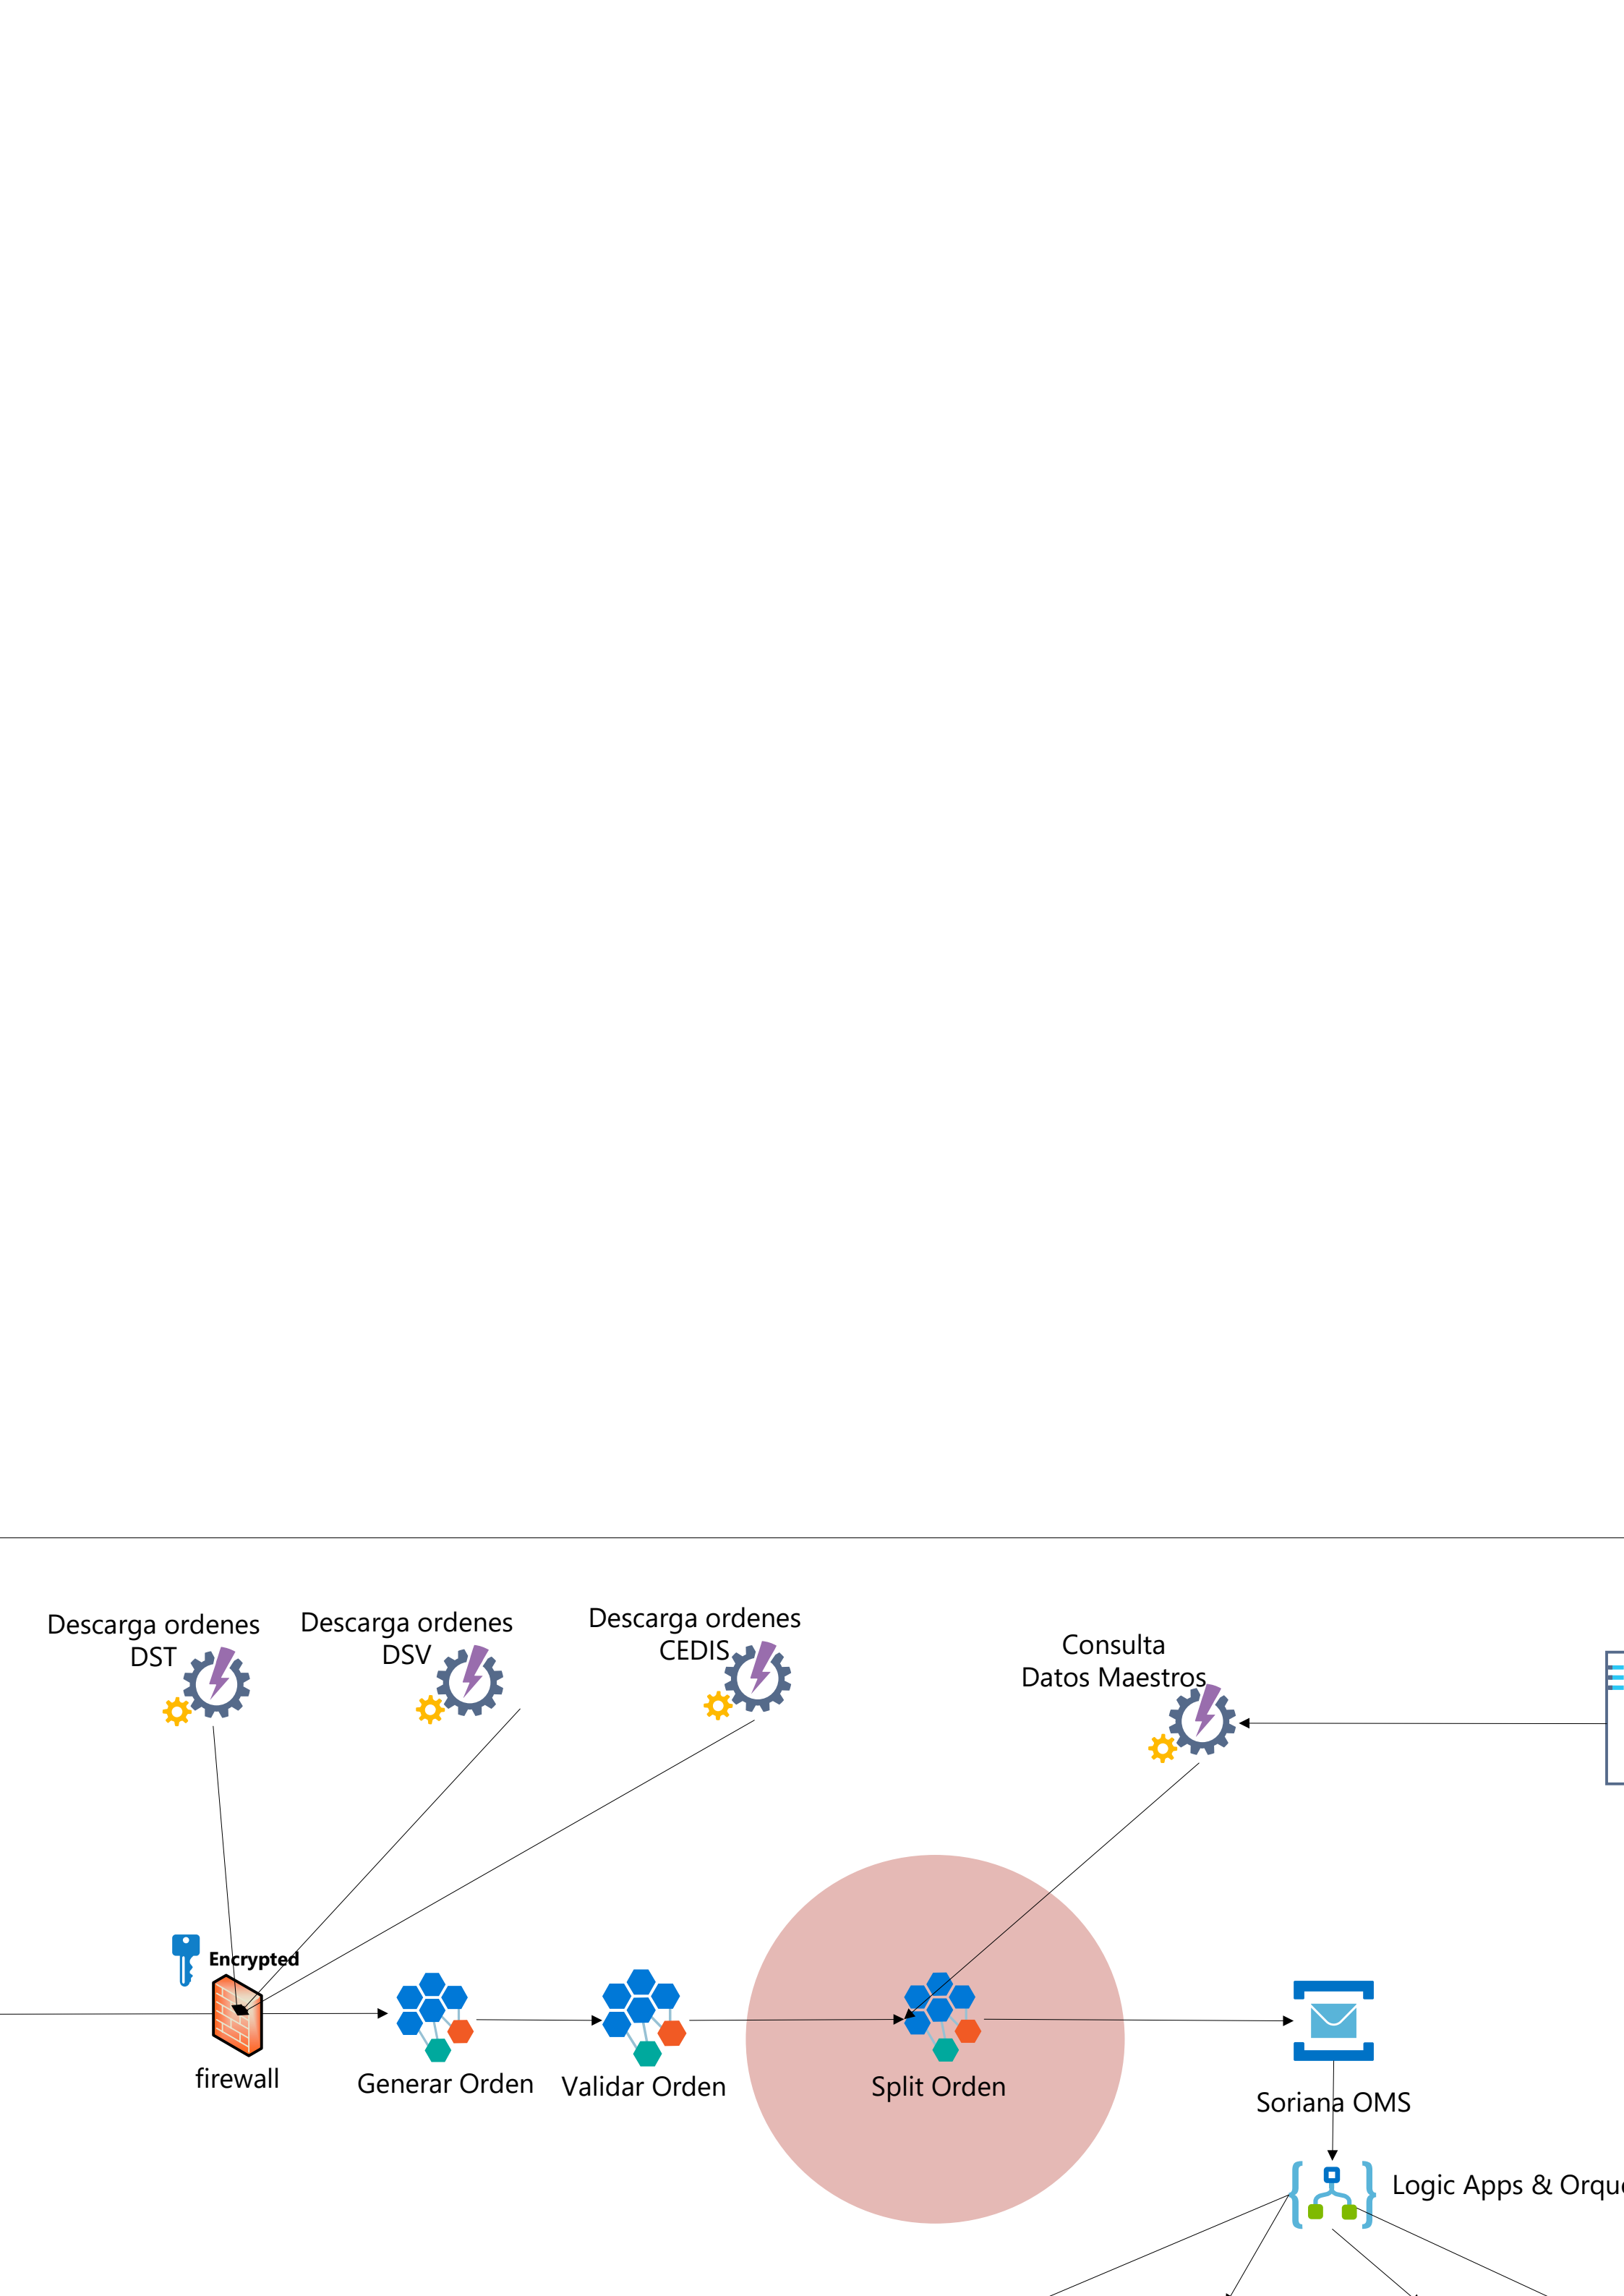

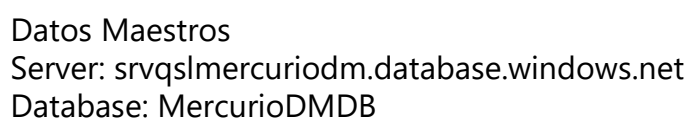

El servicio de replica necesita que el server CorpWebApp02, tenga habilitado el protocolo de transporte TLS 1.2
Esto es debido a que MercurioDB en Azure, exige que las conexiones sean seguras y como minimo de TLS1.2

- propiedades dimesion (largo, ancho, alto, peso, volumen)
- clasificación el tipo de almacen que los ofrece

```
1 -setc      -grocery
2 -cedis     -non grocery
3 -vendor    -non grocery
4 -extendido -non grocery
```

CatalogoAlmacen_vendedor --> para DSV debera tener por proveedor y almacen
